

RITIK CHOUHAN

Python Backend Engineer · Selenium · AWS · REST APIs · Microservices
Pune, Maharashtra | +91-6377216003 | ritikchouhan373@gmail.com | GitHub: ritikchouhan766

PROFESSIONAL SUMMARY

Python Backend Engineer with **2+ years** of experience building scalable backend systems, REST APIs, and Selenium-driven automation for **real-time multi-source data procurement**. Skilled in microservices, ETL pipelines, SQL optimization, and AWS/Azure deployments. Awarded **Highest Achiever** — Capgemini NGT 2025 (top 5% of 200+ intake).

CORE COMPETENCIES

- Python Backend Development
- ETL & Data Pipelines
- Microservices Architecture
- Azure DevOps & CI/CD
- Selenium WebDriver Automation
- Multi-Source Data Procurement
- AWS Cloud (Lambda, EC2, S3)
- SonarQube Code Quality
- REST API Design & Integration
- Real-Time Data Processing
- SQL Optimization & Indexing
- Agile & Cross-Team Delivery

PROFESSIONAL EXPERIENCE

Software Engineer

Apr 2024 – Present

Capgemini Pvt Ltd, Pune — Insurance Domain | Jan 2025 – Present

- Spearheaded multi-source real-time data procurement using Selenium WebDriver, automating extraction from 10+ insurance and government portals — reducing manual effort by **60%**.
- Engineered Python REST APIs and ETL pipelines to ingest, validate, and transform high-volume insurance data, improving data accuracy by **35%**.
- Designed reusable backend modules for metadata-driven data processing, cutting pipeline build time by **40%** across the team.
- Deployed scalable serverless services on Azure (Function Apps, Blob Storage, Logic Apps) supporting **10,000+** daily operations at **99.9%** uptime.
- Authored unit/integration tests with **80%+** coverage (SonarQube enforced), reducing production bug leakage by **25%**.
- Awarded **Highest Achiever** — NGT 2025, Capgemini (top 5% of 200+ new graduate batch).

Python Developer Intern

Sep 2023 – Apr 2024

BLG Construction, Jodhpur

- Built Python and Selenium automation workflows for contractor tracking; implemented a 24-hour ticketing system reducing response time by **40%**.
- Optimized SQL queries for attendance, leave, and payments — improving query performance by **30%** through indexing and restructuring.
- Developed REST APIs for internal HR and contractor portals, handling structured operational data across departments.

PROJECTS & POC

Transaction Processing Backend — Python, FastAPI, PostgreSQL, AWS EC2/S3

- Architected a multi-service banking platform with FastAPI microservices and CQRS patterns; async API optimization improved throughput by **30%**. Deployed on AWS EC2 with S3 audit logging and JWT/RBAC security.

Multi-Source Data Ingestion System — Python, Flask, AWS Lambda, PostgreSQL

- Built a real-time ingestion engine with Flask REST APIs and AWS Lambda auto-scaling; SQLAlchemy query optimization improved read speed by **30%**. CI/CD pipelines ensured **99.9%** uptime for downstream consumers.

TECHNICAL SKILLS

Languages & Backend: Python, SQL, JavaScript, FastAPI, Flask, Django, REST APIs

Automation & Data: Selenium WebDriver, ETL pipelines, multi-source scraping, real-time data processing

Cloud & DevOps: AWS (Lambda, EC2, S3, SNS), Azure (Functions, Blob Storage, Logic Apps), Docker, Azure DevOps CI/CD

Databases & Quality: PostgreSQL, SQL Server, MySQL, SQLAlchemy, SonarQube, Pytest, Jest, 80%+ coverage

EDUCATION

Master of Computer Applications (MCA)

Chandigarh University, Mohali | 2021–2023

CGPA: 7.54

Bachelor of Computer Applications (BCA)

Jai Narayan Vyas University (JNVU), Jodhpur | 2019–2021

Percentage-74%

CERTIFICATIONS & ACHIEVEMENTS

- Highest Achiever — NGT 2025, Capgemini (top 5% of new graduate intake, batch of 200+)
- Python for Everybody — University of Michigan via Coursera
- AWS Cloud Practitioner Essentials — AWS Skill Builder
- AI For Everyone (Coursera) | Agile Software Development (Coursera)
